**296025**

Dear Maurice:

The Site Safety Health Plan for the Hot Spot in New Bedford Harbor was reviewed by the New Bedford Fire Department, Civil Defense Department and the Department of Public Works - Environmental Division. The City departments have the following comments:

- The plan includes MSDS for Chemicals of Concern Appendix I. Please include quantities for chemicals on site.
- Work Med is listed as an Emergency Facility. Work Med is a rehabilitation facility for injured workers only. They are unable to accept persons for emergency treatment. Please remove them from the Emergency Medical Facilities list Appendix B, page B-13 and 14 and replace their phone number on the Emergency Notification List Appendix D, page D-15 with that of Metromedic Medical Center (508) 997-2900.
- The Fire Department and the Haz Mat Team telephone number is listed incorrectly in the Emergency Notification list - Appendix C page C-13 and Appendix D page D-15. The correct telephone number is (508) 991-6100.
- The LEPC telephone number is (508) 991-6386.
- Please note that the Police Department dispatches the ambulance. Each Contingency Plan in Appendix D-1, Containment Control Contingency Plan, should contain a step to notify the Police Department, so that an ambulance may be dispatched to the incident in a timely manner.

At this time the City does not require a meeting with Perland, as the comments listed above are minor. However, City emergency response personnel will require on-site training as discussed in the plan, and will await for notification of the appropriate time for this on-site training.

Thank you for the opportunity to review and comment on the SSHP, please feel free to contact me with any questions.

Sincerely,

*Elizabeth A. Bettencourt*
